Machine Builders and **Integrators** also chose Secomea Remote Device Management because:

State-of-Art Security:

- Maximum security with built-in firewall and strong AES/SSL encryption

- Two-factor user authentication with x.509 certificates and password

- End-to-end audit log and control

Easy Configuration:

- Built-in default serial and Ethernet agent templates for all major PLC, Servo and HMI vendors

- Automated agent templates for video, voice, PC and SCADA systems for more advanced use

- Reconfiguration of the local PLC with gateway address etc. is rarely needed

- IP subnet conflicts known from e.g. VPN are eliminated

- Firewall friendly communication simplifies set-up, and eliminates involvement of IT departments

- Co-exists with existing customer network - No requirement for public or fixed IP address

Ease of use:

- Web based user interfaces with comprehensive online help

- Uniformed remote access for all types of installations and equipment

- LinkManager co-exist with virtualization software, VPN clients, proprietary PLC software etc.

- No configuration required on the LinkManager. Everything is included in the access certificate.

Central Management:

- Flexible device access management with instant effect for the LinkManager user

- E-mail and SMS alert module for device status and specific PLC values (e.g. max temperature)

- Centralized configuration access for SiteManagers, LinkManagers and even the monitored equipment

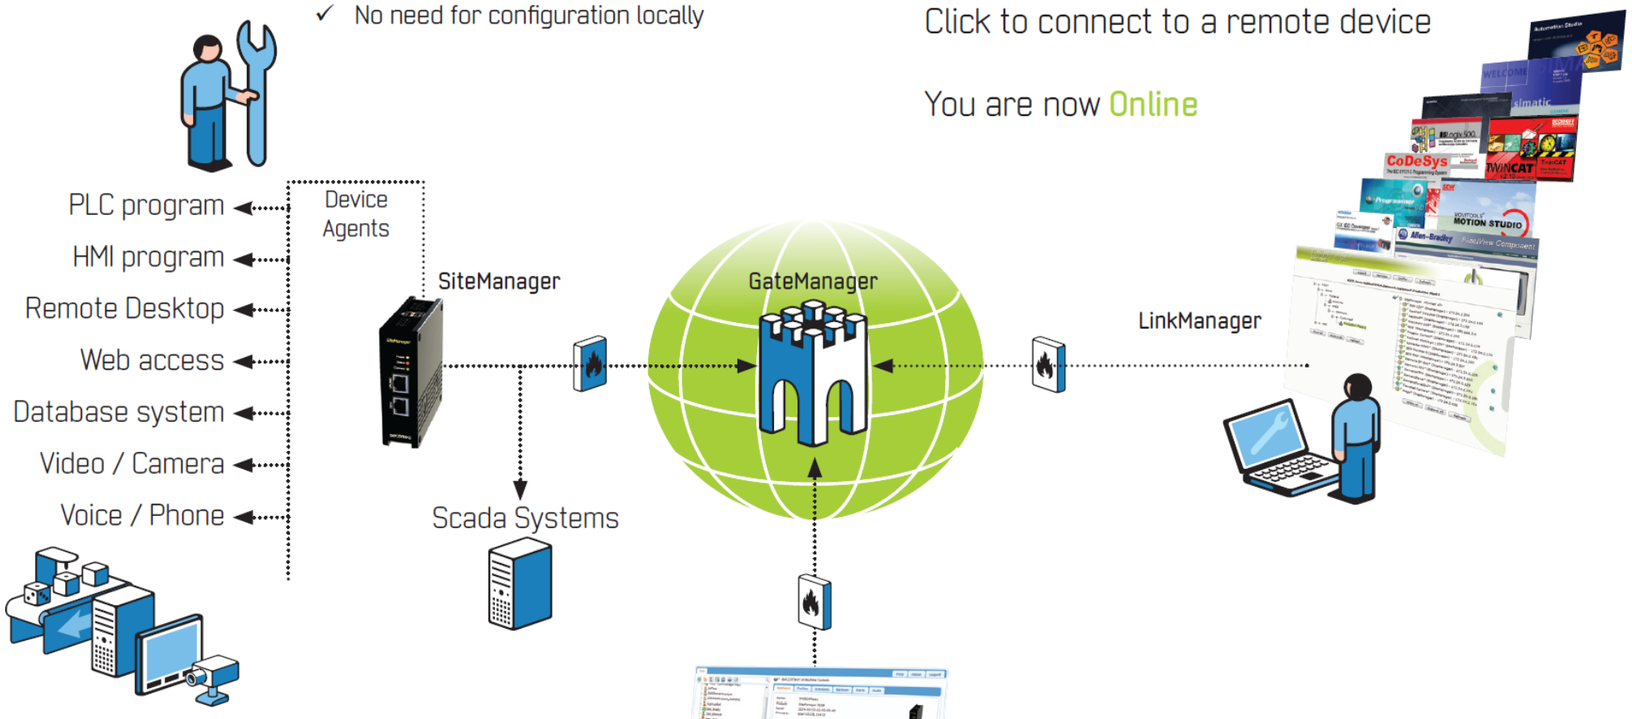
- Bulk firmware upgrades, and automatic configuration back-up after configuration changes.

Get started in less than 15 minutes ⟶ with the Secomea **BASIC Intro Package**

1 SiteManager

Install **SiteManager** and enter the GateManager Server that it should connect to

- ✓ No need for open ports in the Firewall
- ✓ No need for fixed IP addresses
- ✓ No need for involving local IT
- ✓ No need for configuration locally



2 LinkManager

Install the **LinkManager** client and the received access certificate on your PC

Login and browse to a Site, a SiteManager or a specific device

Click to connect to a remote device

You are now Online

3 UPGRADE to GateManager Entry or Enterprise and also become...

GateManager Administrator

- ✓ Fine-grain user access for specific sites or equipment
- ✓ Create unlimited LinkManager accounts
- ✓ Automatic configuration backup
- ✓ Bulk-upgrade SiteManager firmware
- ✓ Remotely access Web GUI of all SiteManagers
- ✓ View audit logs
- ✓ Create email alerts based on device status

SPX
WHERE IDEAS MEET INDUSTRY

Helping A Worldwide Business To Guarantee 99.7 % Uptime

Through the alliance between APV and Secomea, APV can now guarantee their clients an uptime of 99.7%

CARNITECH

Another Dimension to the Global Service Offering

The Remote Device Management solution from Secomea lets Carnitech's knowledgeable automation people utilise the benefits of the Internet, with state-of-the art security and high speed online service and support – all over the world.

MEINCKE

Extending engineering expertise into your pastry production line

The Secomea remote management solution, not only represents a huge data transfer rate improvement, but has also simplified the method for giving engineers secure access to the equipment considerably.

BOSCH

Security – The Number One Priority

Bosch Packaging Technology wanted to optimize the provisions of their aftermarket offerings with a real–time Internet solution, with security for both customers and themselves as number one priority. To meet these challenges, Bosch Packaging Technology implemented the Remote Device Management solution from Secomea.

WEISS

Increased Efficiency through Uniformity

A strong team with many years of experience. To achieve increased efficiency through uniformity, WEISS implemented the Remote Device Management solution from Secomea.
