* Tested to Australian Commercial Air Compressor Association (ACACA) Protocol.

Benefit from high quality, slow running cast iron compressor pumps // proven longevity in Australian conditions // reduced service costs and component count // backed with local service and genuine spare parts // low running costs.

Heavy duty design

All Air-One™ compressors are made from high quality materials, they are slow running and robust which ensures longer life cycle operation and reduced service requirements. The units also feature TEFC IP 55 drive motors which are all MEPS 2 compliant.

Ease of installation

Air-One™ is designed for simple installation and reduced footprint with a range of specifically sized receivers to ensure optimum operation. All air receivers are designed and registered to the AS 1210.

Economic installation

Air-One™ compressors are designed with energy saving in mind, they are pressure switch controlled which ensures efficient operation at all times with no wasted energy. These units are ideal for fluctuating demands while still giving uncompromising reliability.

Keep your compressor running like new with a Sullair Customer Care service plan. Speak to your sales specialist today. Our factory trained technicians use only Sullair recommended and genuine spare parts which means longer life, reduced energy costs and better performance.

ALL COMPRESSORS ARE BACKED WITH FAST DELIVERY, INSTALLATION AND A RANGE OF SERVICE SOLUTIONS
