

Remtron Schneider PLC Starter Kits

Ever wanted to learn how to program Programmable Logic Controller (PLC)? How about connecting one up to a variable speed drive (VSD) and displaying all information onto a touch screen?

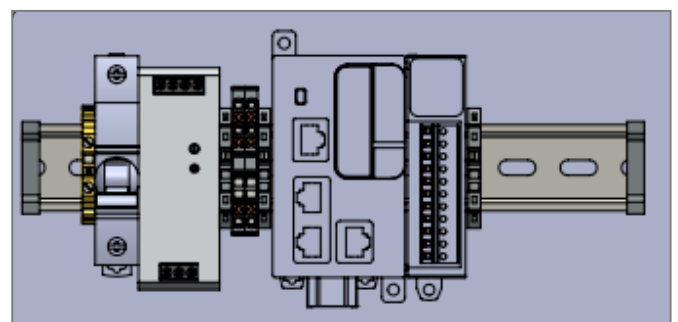

For a limited time, Remtron, together with our partners, are offering PLC Training starter kits **including in person training!** The training varies from 4 hours for a basic level to a full day when selecting advanced machine PLCs with IIOT capabilities such as MQTT, HTTP, JSON & OPC UA.

You will learn: How these devices communicate to each other over Ethernet as well as set up various applications such as tank level control.

- Training notes and application notes will also be provided.
- All relevant software is included.
- Advance kits include licensed copies of Schneider Electric EcoStructure Machine Expert suite.
- All kits come mounted onto Din rail stands with power supplies, breakers and everything necessary to get you up and going!
- All courses will be organised at regular intervals based on a minimum participant number, or at the discretion of Remtron.

PLC TRAINING AVAILABLE		
Level	Description	Duration
BASIC	M221 PLC, VSD & HMI	6 Hours Training
INTERMEDIATE	M251 PLC, HMI	8 Hours Training
ADVANCED	M262 PLC	2 Days Training

PLC Training starter kits

Start your Automation Journey with the Modicon M221 PLC Starter Kit

- ▶ M221 PLC with 16 I/O, 2 AN input, Ethernet I/P & Modbus TCP
- ▶ Basic HMI – 7"
- ▶ ATV320, 0.18 KW Drive

Special Price
\$1,410

The M221 starter kits provide a complete introduction to PLCs for both novices and experienced engineers. Each kit includes PLC hardware, HMI, ATV320 drive, essential accessories and software tools. With an easy setup, users can quickly grasp automation basics and build a foundation for advanced projects. These hands-on kits empower users to confidently design, implement, and optimize automation solutions.

Unleash Your Automation Potential with the Modicon M251 PLC Intermediate Kit

- ▶ M251 PLC
- ▶ Advance HMI – 4" Ethernet Comms

Special Price
\$2,350

Elevate your automation projects with the M251 PLC Intermediate Kit. Experience high-performance solutions for modular machines and distributed architectures, all powered by the Schneider Electric EcoStructure Machine Expert suite. Simplify development and evaluation with this cutting-edge kit and take your automation to new heights! Each kit includes PLC hardware, advance 4" HMI, essential accessories and software tools

Kickstart your IIOT Journey with the Modicon M262 PLC kit

- ▶ M262 – 4 fast I/O Logic PLC

Special Price
\$2,300

The Modicon M262, our latest controller, is your gateway to advanced IIoT capabilities. With support for cloud protocols (MQTT, HTTP, JSON, OPC UA) and encryption (TLS), it seamlessly integrates into our EcoStructure Machine architecture. Experience direct cloud connectivity, robust digital services, and unmatched performance for demanding machines with the Modicon M262 Logic controller. Elevate your IIoT projects today!
